

# State of geomorphological research in 2023

April  
18-21  
2023

## Key deadlines

March 15 2023	Registration (Abstract submission)
March 15 2023	Payment
Early April	3rd Announcement with conference programme
April 2023	Conference

2nd  
Announcement

Hotel  
Širák,  
Most

## Preliminary programme

18-19 April	Pre-conference workshop on landslide monitoring
19 April	Best Thesis Contest Award ceremony
19 April	Plenary session
19 April	ČAG General Assembly
20 April	Thematic sessions
20 April	Poster presentations
21 April	Field trip to open-cast mine

ČAG

## The third ČAG pre-conference Workshop will be focused on the geotechnical monitoring of landslides.

The general aim of the workshop will be to introduce the traditional geotechnical monitoring technique – borehole inclinometry, including data processing and interpretation. The first part of the workshop will be devoted to field data acquisition, while the second part will be focused on data processing and interpretation. In addition, several examples from different sites will be presented and discussed.

Furthermore, the issue of the influence of temperature variation on geotechnical measurements will be presented. What is the cause, how to quantify its influence on the measurements and how to compensate for this negative phenomenon? That will be the main questions during the third part of the workshop.

The workshop will take place on 18 April afternoon (fieldwork on Březno u Postoloprť) and 19 April morning (data processing and interpretation in Most). The workshop is intended for pre- and post-gradual students, and it is free of charge. Due to the limited number of participants, it is advisable to reserve your place well in advance.

## Conference excursion

During the conference excursion (field trip), we will visit the open-cast brown coal mines in the North-Bohemian Basin. The plan is to use special trucks that can take us down to the mines, where specific anthropogenic landforms can be seen. This is to be confirmed yet, however. In any case, it is advisable to be prepared for a muddy terrain down in the mines.

# State of geomorphological research in 2023

April  
18-21  
2023

**Registration** shall be made using the following form, which also summarizes all necessary information:

<https://forms.gle/GYECzUujhLYubQMK9>

## Payment details

The **conference fee** includes conference services (conference rooms, one conference dinner, coffee breaks, information materials, excursion).

Participants **paying in CZK may use online payment gateway**:  
Standard fee (non-members): 2500 CZK: [Standard fee payment](#)  
Reduced fee (CAG members): 2200 CZK: [Reduced fee payment](#)

Those **paying in other currency will be provided with an invoice** upon the registration and shall use a bank transfer.  
Standard fee (non-members): 100 EUR  
Reduced fee (CAG members): 90 EUR

**Accommodation** shall be arranged individually by participants. The Hotel Širák (<https://www.hotel-sirak.cz/cs>) is a conference venue, but it has a limited capacity (ca 50 persons; prize varies between 1200-1600 CZK per person, incl. breakfast). Other accommodation facilities are located nearby.

**Meals** will be ordered and paid individually on site, but we request preliminary information on your plans, so we can inform the Hotel facility about approximate numbers of dinners and lunches and specific dietary requirements.
